

Life in a Paradise

zeta orion

July 21, 2026

Engineering taught me how to handle tough situation in a way for eg: if i have exam tomorrow then, i before one day i can study easily and get good marks in exam. This also helps in real world when i have any thing i have to do urgent tomorrow i will be ready for that before one day

I have experience in writing all assignment one day before .If i have to submit project tomorrow i can complete it 2-3 days coz i have developed in that manner so that even if get a situation,i can easily handle it.
